Continuation of Attachment(s) 3. Information Disclosure Statements (PTO/SB/08), Paper No./Mail Date: 5/7/04, 1/9/04, 9/29/06.

Allowable Subject Matter

1. Claims 1-16 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Prior art of record, taken individually or collectively, fails to fairly teach method and apparatus for timing synchronization in a receiver, as claimed, including "a channel estimator configured for estimating an initial code phase of the received signal; a code generator configured to generate a timing reference code that is adjustable by integer increments; and an interpolation feedback circuit configured for interpolation and correction of the timing error, whereby the interpolation is achieved through an integer code shift, plus a quantized fractional delay estimate selected from a look-up table of quantized fractional delay estimate values and their associated predetermined interpolator coefficients, from which a time corrected version of the received signal is produced" in independent claim 1 and similarly in independent claim 11 (claims 2-10, 12-16 depend therefrom). Thus, claims 1-16 are found to be novel and unobvious over prior art of record.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Krasner (US 6,633,255) discloses Method For Open Loop Tracking GPS Signals.

Art Unit: 2611

Mannermaa (US 6,483,867) discloses Tracking Loop Realization With Adaptive Filters.

Sullivan (US 7,027,486) discloses System And Method For Fast Code Phase And Carrier Frequency Acquisition In GPS Receiver.
